

India: NTPC Power Generation Project (1999)

On November 29, 1999, the Inspection Panel received a second Request for Investigation from a representative of people living in the project area who claim to be adversely affected by the NTPC Power Generation Project. The Request alleged non-compliance with Bank policies on Involuntary Resettlement, Bank Supervision, and Environmental Assessment. The Request was filed after the loan financing the project closed in March 1999 and, therefore, was not registered.
